

UNPARALLELED LOGISTIC PERFORMANCE

FITNESS & HEALTH

Your equipment always in peak condition

Top class. That is how you can confidently describe our care for fitness, wellness and health equipment. We operate at the highest level, from warehousing to installation. For we are Eijgenhuijsen. And for more than 100 years, our name has been synonymous with Precision Transport. For us, better is not enough; we aim for the best. Simply because the transport of special and delicate equipment allows no concession whatsoever. That explains our dedicated involvement. With you and your products. With your customers. And with everything in between.

FINGER ON THE PULSE, ALWAYS

With Eijgenhuijsen BV Precisievervoer, you can rest assured that everything runs smoothly. Down to the smallest detail.

OUR EMPLOYEES ARE FULLY TRAINED TO PERFORM AT TOP LEVEL

The order intake, the warehousing, the site survey, the transport, of course, and the finishing touch: the installation of your equipment on site. We excel in all of these disciplines, every day, always. And throughout this logistics process, we always keep you and your customers informed every step of the way. We don't just deliver, we hand over. Exactly as we have agreed with you. And we only leave site when your customer is 100% satisfied. If required, we collect your old equipment and return it to you with just as much care. But you wouldn't expect anything else from us, would you?

Don't leave anything to chance.
